

World Records

World Championship Records: Official Compilation

This compilation recognizes as Champions those horses that have made the fastest time at their gait, age, and sex on the major sizes of tracks, either against time or in a

race at one mile. This is the distance upon which the sport of harness racing has been established. New records for 2010 appear in **boldface**.

Trotting on a Greater-Than-One-Mile Track

*Times, prior to 1947, were recorded in one-quarter second increments, and then in one-fifth second increments thereafter.

"Parked-Out" Computations

Harness racing mathematicians have compiled these figures that reveal the added distance in each one-mile race that a horse travels when it is

"parked out." That is to say racing outside another horse, five feet out from the point at which the track is measured:

1/2-mile track (or tracks with four turns to a mile)A horse must travel an extra 62.832 feet
5/8-mile track (three turns)A horse must travel an extra 47.124 feet
3/4-mile track (chute), 7/8, and mile track (two turns)A horse must travel an extra 31.416 feet
Tracks more than one mile in circumferenceA horse must travel an extra 15.708 feet
